

## HALVERGATE SEWAGE WORKS

Anglian Water Sewage Works has been experiencing some problems over the past few weeks and have taken the decision to take it offline for internal inspection.

This involves emptying the contents of the large tank (some 1000m<sup>3</sup>), whilst also dealing with incoming domestic flow from the area (some 200m<sup>3</sup> per day). Unfortunately this will mean multiple tanker movements along the “playing field” road and through the village towards the A47 to dispose either at Norwich or Caister.

They are hoping that residents will not be disturbed too much and will understand that this is not action that would usually be taken due to the high cost and environmental impact of tankers.
